- Javits Center ~~W~~indow ~~C~~leaning

As ~~a~~-the billion-dollar reconstruction of ~~The~~-the Jacob K. Javits Center ~~came to an end~~was ~~completed~~, Big Apple ~~W~~indow ~~C~~leaning was hired to provide a post-construction glass cleaning and ~~put a sparkle back on~~ ~~give back~~ the stunning glass structure ~~its sparkle~~.

- Court ~~B~~uilding ~~F~~açade inspection

~~A~~ ~~230-foot~~' platform was deployed for the task and the entire project was completed in just ~~3~~ ~~three~~ days instead of ~~3~~-~~three~~ weeks if done ~~from the~~ ~~with~~ scaffolding. The job was ~~done~~ ~~completed with no~~ ~~without~~ interrupting ~~on~~ ~~to~~-street traffic or ~~C~~court activities, ~~and~~ with substantial savings ~~to in the~~ city's budget.

- ~~Window~~ ~~C~~aulking at ~~height~~

~~A~~ ~~165-foot~~' spider lift was deployed to ~~help the building management with~~ ~~facilitate the~~ caulking and water proofing of ~~2~~-~~two~~ lines of windows between the ~~13th~~ and ~~7th~~ floors of the building.

- West Side Highway project

Instead of erecting temporary scaffolding on ~~a~~-the roof of the building and putting a pedestrian bridge on the busy West Side Highway in NYC, ~~the~~ building management hired Alpha Platforms. Our ~~230'~~ ~~230-foot~~ lift provided a safe and stable work environment to service specialists and waterproofing engineers. The entire project took just ~~4~~-~~four~~ days.

- Queen of the Seas meets Queen of the Skies

Everything is relevant in this life. Our huge ~~80,000-000-lb~~ ~~230-foot~~' high ~~aerial~~ work platform ~~is~~ caught on camera while passing by Cunard's mighty Queen Mary ~~III~~.

- Sign installation

Alpha Platforms was hired by a local sign ~~i~~nstallation company- ~~as~~ ~~T~~raditional lifts were ~~not~~ ~~unable~~ to reach ~~the needed~~ ~~desired area~~ ~~height~~ due to hospital yard weight restrictions and ~~plenty of~~ ~~numerous~~ trees ~~around~~ ~~surrounding~~ the building. ~~The~~ A-200 ~~T~~ruck-~~mounted~~ platform was parked in a parking lane on a busy street and reached ~~the needed~~ ~~desired~~ area (about ~~95'~~ ~~95'~~ feet-side reach) with ~~no~~ ~~out~~ problem. The entire work was ~~done~~ ~~completed~~ in ~~6~~ ~~six~~ hours.

- Sunbathing on the roof of ~~a~~ ~~20th~~-story building

Formatted: Font: 12 pt

Formatted: Font: 12 pt

James: The budget of what of the city does this refer to? Please specify.

James: Please specify the height in this case. The use of only the word "height" is vague and may not interest the reader.

James: 1. Is this meant to be the 13th and the 17th floor? If it is indeed between the 7th and the 13th floor, please state so as "between the 7th and the 13th floor of the building".

2. Which building is "the building"? If you do not wish to provide the name, please refer to it as "a building in... [provide location of building]".

James: Which building are we referring to? Please provide a name. Alternatively, please check if this is meant to be "the roof of a building".

James: This is a very ambiguous statement and does not relate to the picture in question - neither does it offer the reader any kind of understanding of what to expect in the description that follows.

James: Is the image meant to show the size of the platform in relation to the size of the Queen Mary II? If so, please specify the same, because the purpose of this description/image seems unclear.

James: This does not have a direct relation to what Alpha Platforms offers. While the tone is light and the description implies that the lift can go as high as 20 stories, the title that says "Sunbathing on the roof of a 20 story building" reveals nothing of significance to the reader. It is in fact vague and misleading.

Please consider rephrasing this title and writing its description in a manner more apt to the efficiency/effectiveness of the lift.

- Javits Center window cleaning

As the billion-dollar reconstruction of the Jacob K. Javits Center was completed, Big Apple window cleaning was hired to provide a post-construction glass cleaning and give back the stunning glass structure its sparkle.

- Court building façade inspection

A 230-foot platform was deployed for the task and the entire project was completed in just three days instead of three weeks if done with scaffolding. The job was completed without interrupting street traffic or court activities, and with substantial savings in the city's budget.

- Window caulking at height

A 165-foot spider lift was deployed to facilitate the caulking and water proofing of two lines of windows between the 13th and 7th floors of the building.

- West Side Highway project

Instead of erecting temporary scaffolding on the roof of the building and putting a pedestrian bridge on the busy West Side Highway in NYC, the building management hired Alpha Platforms. Our 230-foot lift provided a safe and stable work environment to service specialists and waterproofing engineers. The entire project took just four days.

- Queen of the Seas meets Queen of the Skies

Everything is relevant in this life. Our huge 80,000-lb 230-foot high aerial work platform is caught on camera while passing by Cunard's mighty Queen Mary II.

- Sign installation

Alpha Platforms was hired by a local sign installation company as traditional lifts were unable to reach the desired height due to hospital yard weight restrictions and numerous trees surrounding the building. The A-200 truck-mounted platform was parked in a parking lane on a busy street and reached the desired area (about 95' side reach) without problem. The entire work was completed in six hours.
